DETAILED ACTION

Response to Amendment

1. The amendments to the specification and abstract of the disclosure in the submission dated 6/20/08 are acknowledged and accepted. In view of these amendments, the objections to the specification in Sections 7 and 9 of the Office Action dated 3/20/08 are respectfully withdrawn. Further, the drawing objections in Section 5 of the Office Action dated 3/20/08 are respectfully withdrawn.
2. On page 4 of the submission dated 6/20/08, Applicants note that amendments were made to Claim 2, and Claim 15 was cancelled. However, no such claim amendments or claim cancellation was made in the claims submitted on 6/20/08.

Information Disclosure Statement

3. The documents listed in the 'Other Documents' section of the information disclosure statement filed 12/20/05 fail to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. These documents have been crossed out, and the information referred to therein has not been considered.
4. In addition, the 2003-119623 document in the IDS filed 12/20/05 was already cited in the IDS filed 3/15/06 and has been considered and made of record. Finally, the Hideki et al. document ('Light diffraction from a bilayer lattice of microspheres enhanced by

specular resonance', J. Appl. Phys., 2/1/04, vol. 95, no. 3, pp. 793-805) in the IDS filed 12/20/05 was cited in the PTO-892 filed 3/20/08 and thus has been considered and made of record.

Response to Arguments

5. The Applicants' arguments, see in particular Pages 4-5 of the submission, filed 6/20/08, with respect to the rejections in Section 11 of the Office Action dated 3/20/08, have been fully considered and are persuasive. The rejections in Section 11 of the Office Action dated 3/20/08 have been withdrawn.

Allowable Subject Matter

6. Claims 1-15 are allowed.

REASONS FOR ALLOWANCE

7. The following is an examiner's statement of reasons for allowance:

Claims 1 and 5 are allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a light diffraction device and method, as generally set forth in Claims 1 and 5, the device and method including, in combination with the features recited in Claims 1 and 5, a first layer containing two or more first light scatterers, two or more of which being periodically arrayed along a first direction and either a) two or more of which being arrayed along a second direction or b) extending along the second direction; and a second layer containing two or more second

light scatterers respectively corresponding to the two or more first light scatterers, the two or more second light scatterers being disposed at positions shifted from the two or more first light scatterers by a predetermined distance along a predetermined direction in a plane that is other than a plane containing the first direction and the second direction; wherein in both cases of a) and b), specular resonance occurs in two or more light scattering units, each comprising one light scatterer selected from the two or more first light scatterers and one of the second light scatterers corresponding to the selected one of the first light scatterers; and whereby a fraction of diffracted light that is diffracted by the first layer and the second layer is selectively enhanced by the specular resonance in the two or more light scattering units. Claims 2-4, 6-8 are dependent on Claims 1 and 5, and hence are allowable for at least the same reasons Claims 1 and 5 are allowable.

Claims 9 and 12 are allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a diffraction grating, as generally set forth in Claims 9 and 12, the grating including, in combination with the features recited in Claims 9 and 12, a first layer containing two or more first light scatterers, two or more of which being periodically arrayed along a first direction and either two or more of which being arrayed along a second direction or extend along the second direction; and a second layer containing two or more second light scatterers respectively corresponding to the two or more first light scatterers, the two or more second light scatterers being disposed at positions shifted from the two or more first light scatterers by a predetermined distance along a predetermined direction in a plane that is other than a plane containing the first direction and the second direction; wherein the

diffraction grating has two or more light scattering units, in each of which one light scatterer selected from the two or more first light scatterers and one of the second light scatters corresponding to the selected one of the first light scatters are disposed adjacent to each other so that incident light can cause specular resonance. Claims 10-11, 13-15 are dependent on Claims 9 and 12, and hence are allowable for at least the same reasons Claims 9 and 12 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
